Your honor,

I'm writing to voice my opposition to the proposed settlement in the U.S. vs. Microsoft case. Microsoft has benefitted from violating anti-trust laws, and this settlement would only increase the company's presence in the market. There is no guarantee that Microsoft, a repeat offender of anti-trust laws as determined by every court, won't continue its anti-competitive behavior. We the consumers pay the price. Please strike down the proposed final judgment which does nothing to punish Microsoft.

Respectfully,
Andrew Silvis
